

The group of

Dr. Ana Rita Brochado

At the Department of Microbiology, Biocenter at Würzburg University offers a
Researcher position

Bacterial genetics and cell biology

Bacteria are among the most difficult-to-treat infectious agents. Our recently established lab develops high-throughput approaches to study antimicrobial mode of action, and decipher how bacterial molecular networks re-wire in response to multi-antibiotic therapies (Brochado *et al*, Nature 2018). We are looking for a motivated Researcher (senior Postdoc) to be part of our team to drive the development of new bacterial genetics and cell biology tools.

We apply a wide range of state-of-the-art systems biology tools, such as high-throughput phenotypic screening of bacterial knockout libraries to elucidate antibiotic mode of action (Brochado *et al*, Nature 2018). We are part of the Biocenter and the ZINF, Würzburg University in Germany, which offer an vibrant and international research environment.

We offer:

- The opportunity to work on a timely topic – antibiotics – in an exciting environment, using cutting edge technologies, with a special focus on high-throughput systems biology approaches in bacteria.
- Continuous scientific mentoring & academic training.
- Up to 5 years position. Salary benefits according to public service positions in Germany.

Requirements:

- Excellent PhD in Biology, Biotechnology or equivalent.
- At least 2 years postdoctoral experience in cell biology of bacteria or bacterial genetics.
- Sound knowledge and strong interest in bacterial molecular biology, biochemistry and cell biology & microscopy.
- Experience with infection biology (tissue culture) is welcome, but not mandatory.
- Fluent English speaking and writing skills, German is not required.

How to apply:

Visit us at <https://www.biozentrum.uni-wuerzburg.de/en/mikrobio/staff/dr-ana-rita-brochado/> for application details and also to find out more about our research! You will need to fill out our application form (electronically), attach your CV, certificates and a motivation letter. **Send all-in-1 pdf file to brochado.recruit@biozentrum.uni-wuerzburg.de. Deadline 21th July or until position is filled.**

The University of Würzburg aims to increase the number of women in science. Therefore, women are especially encouraged to apply for this position. Physically handicapped persons will be preferred in case they are equally qualified.

Academic record

Are you currently working in Academia?

Yes No

What is your highest academic degree?

BSc MSc PhD

What position are you applying for*?

PhD student Postdoc Scientist

*Please note that 2 years postdoc in a relevant field (bacterial genetics or cell biology) are required for you to be considered for the Scientist position.

Current employer or university:	
City:	Country:
Current position:	
Supervisor (if applicable):	
Year of highest academic degree (BSc, MSc or PhD):	
Title of most relevant publication:	
Journal of most relevant publication:	
Year of most relevant publication:
