

The Biocenter of the University of Würzburg is an interdisciplinary center for basic research with currently 14 departments and chairs. The mission of the Department of Microbiology is the investigation of molecular principles leading to diseases as consequence of bacterial infections. We invite applications for postdoctoral positions available in the Department for Microbiology for up to 2 years.

**Postdoctoral Scientist
(reference number: MiBio/05/10)**

We plan to extend our research on vaccine development against infectious diseases. Candidates with a strong background in vaccine development, particularly live attenuated Salmonella vaccines, are invited to apply.

**Postdoctoral Scientist
(reference number: MiBio/06/10)**

Invited are candidates with a strong background in immunology and animal infection models.

For details, please see <http://www.mikrobio.biozentrum.uni-wuerzburg.de/> or contact Prof. Thomas Rudel (thomas.rudel@biozentrum.uni-wuerzburg.de).

Salaries will be according to TV-L. All projects will be supported by technical staff and will have access to the excellent infrastructure of the institute.

The University of Würzburg is an equal opportunity employer. Women and individuals with disabilities are strongly encouraged to apply.

Please direct applications including the name, addresses and telephone numbers of two references till 01.04.2021 to

Lehrstuhl für Mikrobiologie
Biozentrum
Am Hubland
97074 Würzburg

or send an e-mail to:

sekretariat.mikrobiologie@uni-wuerzburg.de

Please only send copies. Due to financial reasons we can not return documents. They are going to be destroyed timely after the selection process. If you include a free envelope, we are going to return your application three months after ending of the selection process.
