

# BIOZENTRUM WÜRZBURG

## Kolloquium

### Mittwoch, 15:15 Uhr, HS A101

Julius-Maximilians-  
**UNIVERSITÄT  
WÜRZBURG**

**29. Oct**

**Olaf Stemmann**

**The p53-dependent mitotic surveillance pathway: Insights into an anti-cancer cellular clock**

**Universität Bayreuth**

**19. Nov**

**Sylvia Erhardt**

**Locus-specific protein profiling identifies the bromodomain inhibitor JQ1 as a molecular glue targeting centromeres**

**Karlsruhe Institute of Technology**

**03. Dez**

**Michael Rape**

**From E3 ligase discovery to new therapies: stress signaling in development and disease**

**UC Berkeley**

**17. Dez**

**Gaëlle Legube**

**Chromosome and chromatin dynamics at DNA double strand brakes**

**Université Paul Sabatier Toulouse**

**21. Jan**

**Juan G. Rubalcaba**

**Toward a predictive macroecology: Scaling biophysical mechanisms to global change predictions**

**Universidad Complutense de Madrid**

**28. Jan**

**Martin Beck**

**Mechanosensitive nuclear pores as guardians of the genome**

**Max-Planck-Institute of Biophysics Frankfurt**
